This is a questing guide detailing an efficient method to obtain and complete quests in Wetlands. For a list of all Wetlands quests in table format, see Wetlands quests. Note: This guide is not meant for power-leveling purposes. Rather, it is meant to show a player an efficient way to complete many quests available for a particular zone. If you know of a better order or method to accomplish this, your input is welcome (in fact, greatly desired). Wetlands are valuable areas that provide clean water, flood protection, sources of food, recreational opportunities, and various forms of wildlife. This guide is designed to meet the need for comprehensive classroom and outdoor wetland activities for grades K-12. The guide is presented in four sections. An introductory section provides a planning guide with suggested teaching units, background information for teachers about wetlands, and methods of identifying a wetland the class can study. The second section making up the majority of the guide contains the activities. The activities are divid
