Quality early childhood education (ECE) is critical in preparing children for future learning. As an early childhood educator, you will have an integral role in promoting children's development from birth to age 12 within the following five domains: cognitive, social, emotional, language and physical. In the ECE program, you will engage in theoretical studies along with practical applications. Moreover, professional practice and ethics will guide you in working with families, understanding pedagogy and fostering belonging and well-being in children. Upon completion of your program, you will ap Classes you may take when studying HDFS could include: child guidance and parenting, contemporary family issues, multiethnic society, early childhood education, human sexuality, child development, lifespan development, psychology, and sociology.
