The PENSUM chiller series with an output of 45 - 480 kW is available as a water- or air-cooled version and adds smaller performance ranges to the established QUANTUM series. The water-cooled unit can be used as a chiller or heat pump, and can also be used for the production of industrial water and hence heat recovery using the desuperheater option. Find out more here >. Marenum. The MARENUM offers extensive seawater resistance. In this vein, non-rusting steels (Austenite 1.4529/1.4547) and high-performance fin-tube heat exchangers made of CuNiFe (copper-nickel-iron) in the seawater-cooled c
